

TENET

Your AI can act.
TENET decides what it is allowed to do.

AI agents got hands. Permission didn't change.

03 : 47 **An action you cannot take back deserves a decision before it runs.**

the agent acts

with real credentials

against a real system

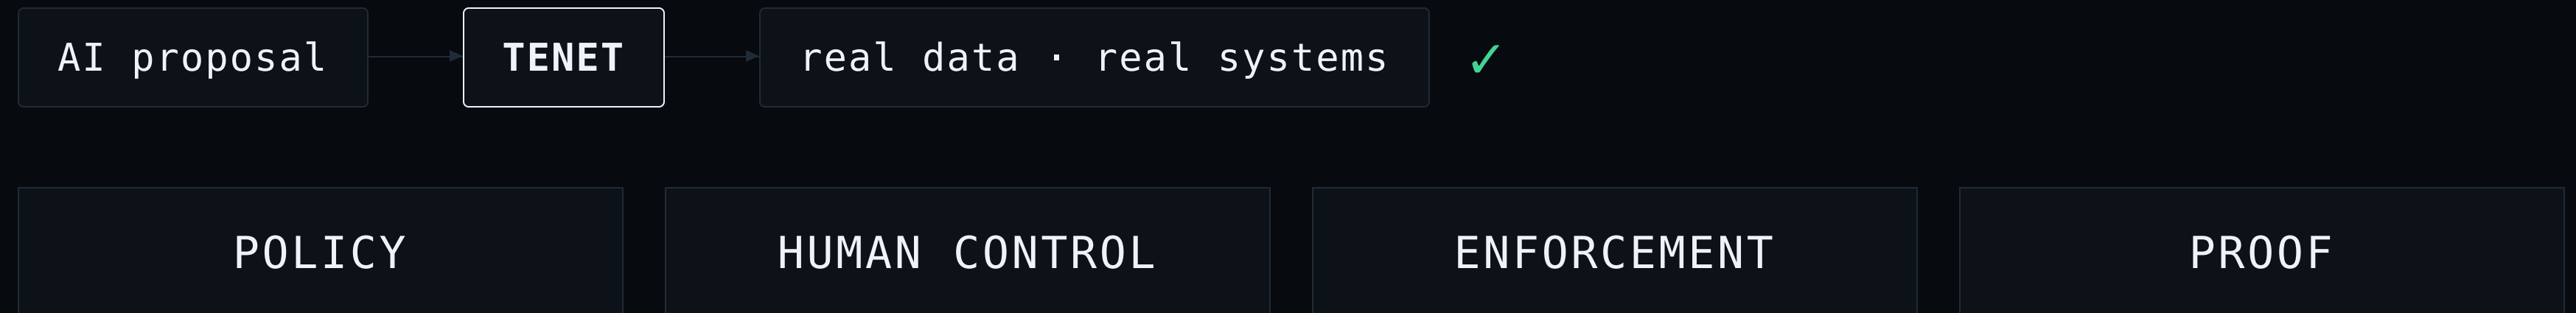

and it has already
happened

Monitoring tells you what happened.
TENET decides whether it can happen.

TENET is not a dashboard and not a SIEM. It decides before the call leaves.

before execution, not after

NO PERMISSION. NO ACTION.

deployed in front of the tool server – one endpoint

the kernel decides; the model never does

human intent

AI proposal – a tool call

TENET evaluates: warrant · entitlement · policy · budget · separation of duties

ALLOW / DENY / HOLD

upstream – or no contact at all

receipt – a record any auditor can read

MCP transports the request.

TENET decides whether it crosses.

LIVE RUN

ENGINEERING TRACTION – NOT REVENUE

EUR/USD 1.1225

HTTP STATUS	LATENCY	UPSTREAM CALLS	ACTION
200	43.4 ms	1	A-0047

DENY

0

UPSTREAM CALLS

A-0003 refused by entitlement before execution.
Nothing left the box — the boundary's own egress
counter: sent 1 → 1.

HOLD

0

UPSTREAM CALLS UNTIL A PERSON DECIDES

A-0004 held, not executed. Approved by a named
person (anna.kowalska) → executed · receipt
062e3ef0.

Control happens before contact.

SOURCED

NO INVENTED MARKET SHARE

22,000+

**DORA-covered financial entities in the EU.
Every one of them now has to prove it can stop what it runs.**

Regulators now ask these firms to prove they can stop what they run.

SIEM

sees what already happened

IAM / PAM

controls human identities

human-in-the-loop

waits for a person to click

TENET

controls the action boundary

We are not replacing them.
We control the moment they don't.

the real competitor is doing nothing until the incident review

the gap is the second before the call

indradev_

the journey and the character: one voice from the film, carried into the live console

153

commits on main, 3–4 Oct

306

tests passing in 33 s

Dmytro Poznanskyi

the control surface: the kill switch and its real states, the layout guards, the architecture record

49

live checks run, 46 green

2

builders, both in the log

ONE REAL TOOL SERVER.

1 night

1 integration

1 control boundary

a human revoke

Give us one action you don't want an AI taking without you.

Our ask is one call: the one you would rather approve yourself.

pilot scope, not pricing

if it holds for one call, we scale it to the rest

TENET

Your AI can act.
You stay in control.
